EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.

Comments: To clean the spill use high voltage DC current through a Jacobs
Later built with graphite rods, (in a cage to protect wildlife) this should
lock the waste in to a non soluble form in water and will settle in a
biologically inert form as sediment.
